PROFESSIONAL SUMMARY

Product Designer with 5 years of experience using Design Thinking and Product Strategy to turn complex, data-heavy workflows into simple and easy-to-use digital experiences. Skilled across the full design process, from User Research and Journey Mapping to Wireframing, Prototyping, and high-fidelity UI Design ,working in Agile / Scrum teams with strong cross-functional collaboration with PMs and engineers.

Currently working at Reliance Jio, designing scalable enterprise and consumer platforms. My work focuses on understanding users deeply, building strong Information Architecture, and using Data-Driven Design to create better experiences.

EXPERIENCE

Reliance Jio Infocomm Ltd.

Mar 2021 – Present

UI/UX Designer

JioBusiness – B2B Platform

- Owned end-to-end UX Design for post-login enterprise dashboards handling high-volume telecom data; defined Information Architecture (IA) and User Flows across onboarding, buy journeys, service management, account tracking, and self-service experiences.
- Led Wireframing & Prototyping in Figma, moving from low-fidelity flows to detailed UI Design; simplified complex data into structured, scalable UI systems.
- Collaborated with PMs and engineers in an Agile / Scrum environment; applied Data-Driven Design using analytics to improve and prioritize features.
- Simplified complex data into structured, scalable UI systems.

Impact: Improved data visibility, strengthened self-service experience, and enhanced usability of enterprise workflows.

JioMeet – Video Conferencing Platform

- Led UX/UI Design for JioMeet using Design Thinking and Product Strategy, defined clear User Journeys, improving ease of meeting scheduling, joining, and in-call experiences.
- Conducted user research and testing to understand pain points and improve usability. Used insights to guide decisions and make the product more intuitive.
- Delivered Wireframing & Prototyping in Figma, moving from low to high-fidelity designs, ensured consistency through Design Systems and supported Responsive & Adaptive Design across devices.
- Collaborated with PMs and Engineers in an Agile / Scrum environment, ensuring smooth delivery and iteration cycles.

Impact: Improved meeting experience by making scheduling, joining, and in-call interactions simpler and more user-friendly across devices.

Little Nest – Children's Club App & Admin Portal

- Sole designer responsible for end-to-end Product Thinking and UX Design of a consumer mobile app and admin portal. Transformed a fully manual booking process into a complete digital ecosystem and launched the app within tight timelines.
- Mapped complete User Journeys for parents and administrators; conducted qualitative & quantitative User Research, created Personas, and validated ideas through Usability Testing.
- Designed booking journeys, calendar views, child progress tracking system, and admin workflows for managing bookings, activities, and operational tasks.
- Used AI-Assisted Design tools to speed up research, idea generation, and early design concepts.

Impact: Digitized club operations end-to-end, improved parent engagement, and reduced administrative effort through intuitive self-service design.

EXPERIENCE

Reliance Jio Infocomm Ltd.

Mar 2021 – Present

UI/UX Designer

Admission Portal – Club & School

- Used Problem Solving and Journey Mapping to transform physical admission workflows into structured digital journeys.
- Designed responsive multi-step forms, document uploads, and tracking flows with clear progress indicators and error-tolerant Interaction Design for trust-critical experiences.
- Delivered fully Responsive & Adaptive cross-platform experiences across desktop and mobile, ensuring consistency and accessibility as a key focus.

Impact: Streamlined admission workflows, reduced manual effort, and improved user clarity through structured digital journeys.

Software Testing Experience

- Worked on Functional testing and requirement validation, building a strong understanding of edge cases and product logic.
- Used these learnings to ensure precise design handoff and smooth Cross-functional Collaboration with engineering teams.

Outshade Digital Media Pvt. Ltd.

Jan 2021 – Apr 2021

UI/UX Designer Intern

- Designed UI/UX for FIXX (car servicing app) and BeEzPz (e-commerce platform); conducted User Research, created User Flows, and delivered mobile & desktop Prototypes in a fast-paced startup environment.
- Applied Product Thinking to service-oriented digital journeys, balancing business goals against user needs.

Impact: Contributed to improving user experience for service and e-commerce platforms by creating intuitive user journeys and responsive designs aligned with business goals and user needs.
